

GENERAL

Data Tech Holdings Ltd is a new business created from the de-merger of Data Installation and Networking Services Ltd., the Woolwich entity having existed since 1999. Originally created to deliver the British Telecom/Marconi SDH contract the company has developed with the COLT (City of London Telecoms) Faults, Maintenance and Installation contract and the Communications Division supporting small works and reactive maintenance supporting every major ISP, Host and Carrier. The Rail Division came into being in 2003 quickly becoming the largest installer of cabling and trackside assets in the London underground sector.

OPERATION

The Company operates a fleet of vehicles to service the above operations comprising medium and heavy vans, vehicles in excess of 3.5 tonnes are not used. Company cars are not used for carriage of tooling, equipment and materials only for the conveyance of personnel.

The vehicles are primarily used for the carriage of tooling materials and equipment to the worksite, multi-drop deliveries are not carried out by the company.

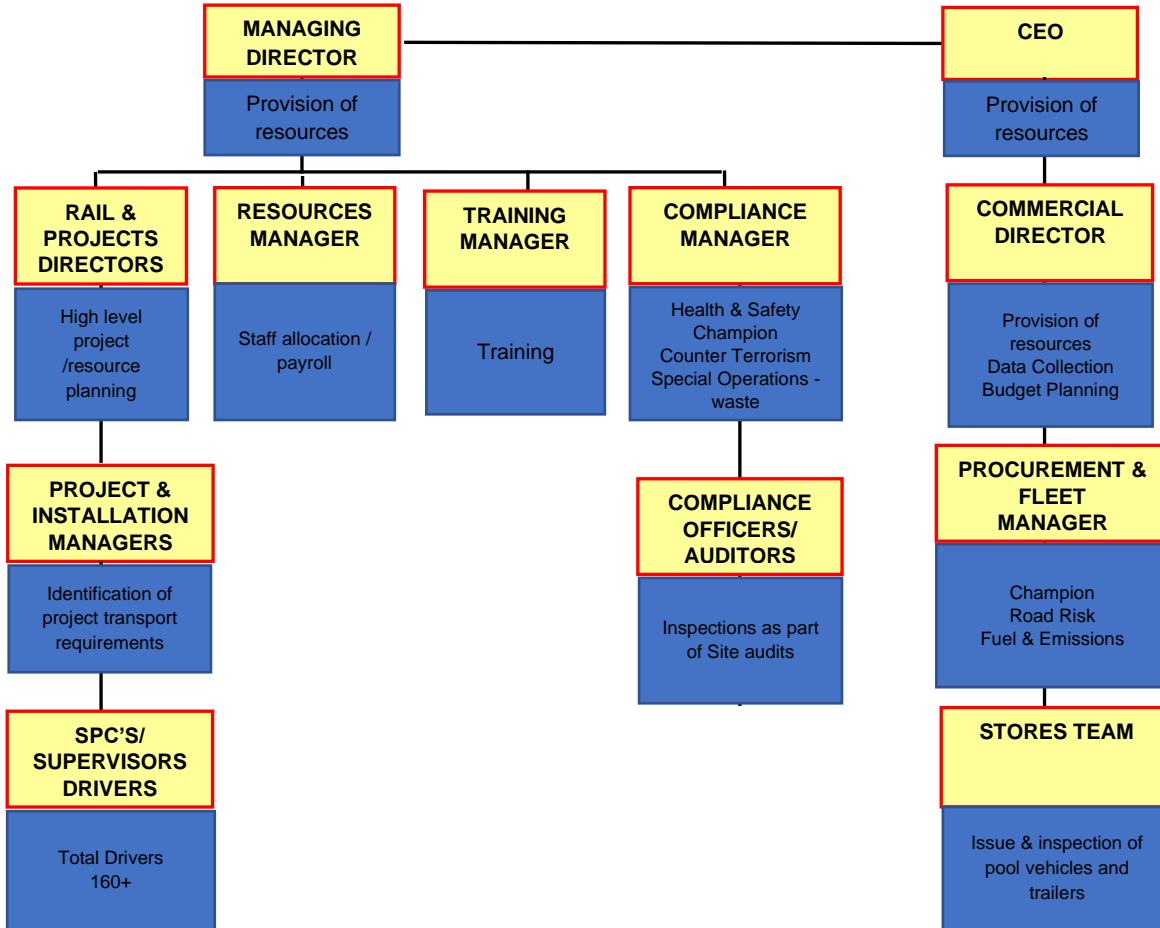

Operations are carried out around the clock.

DRIVERS

The company has currently in excess of 160 authorised drivers, some with allocated vehicles, others being authorised to drive pool or shared vehicles. This number varies in accordance with the needs of the business.
